Education

**Diploma in Engineering, Intelligent Decision
Systems**

Jan 1995 - Jan 2001

National Technical University "Kharkiv Polytechnic Institute", Kharkiv

Employment

Javascript Developer

Dec 2021

Vilmate LLC, Kharkiv, Ukraine

Projects:

Web application for dispatchers (creating, updating shipments, assigning to certain drivers, and drivers support) - Developing from scratch

React Developer

Responsibilities: New features implementation. Creating screens and components. MapBox implementation, Chat feature.

Technologies: Typescript, RTK Query, Formik, MapBox, Git, WebSocket, MUI, BANKId.

**Mobile application for drivers who make terminal or courier deliveries
(Developing from scratch)**

React Native Developer

Responsibilities: Application development from scratch to publication in Google Playmarket. Worked with a built-in Zebra and Newland devices scanner, added map feature implementation, and implemented chat feature.

Implemented several features using native module - such as - sending driver position in background mode, opening their part app with parameters, and replacing react native library for built-in Zebra device scanner with java class.

Technologies: Redux Toolkit, Formik, MapBox, Git, Firebase push notification.

Web application for drivers (3 stand-alone web apps that get the ability to send tire and fuel reports and approve delivery by BankID) - Developing from scratch

React Developer

Responsibilities: New features implementation. Creating screens and components.

Technologies: Typescript, RTK Query, Formik, Git, MUI.

Mobile application that allows runners to make donations to Ukrainian charity funds. RunForUkraine.com

React Native Developer

Responsibilities: New features implementation. Updated design and logic.

Technologies: React Native, RTK Query.

Web application that allows runners to make donations to Ukrainian charity funds. RunForUkraine.com

React Developer

Responsibilities: New features implementation. Creating screens and
